Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti: **Prerequisites:**

<ul style="list-style-type: none"> • Zaključen prvi letnik študijskega programa. • Mora imeti predhodna znanja iz termodinamike. • Študent mora pred izpitom pripraviti in predstaviti ter zagovarjati projektno seminarsko nalogo. 	<ul style="list-style-type: none"> • A prerequisite for inclusion is enrolment in the first year of study. • Student has to have basic knowledge of thermodynamics. • Student has to prepare, present and defend a project seminar before the exam.

Cilji in kompetence:

Učna enota prispeva predvsem k razvoju naslednjih splošnih in specifičnih kompetenc:

- sposobnost samostojnega in ustvarjalnega raziskovalno-razvojnega dela na področju strojništva,
- sposobnost samostojnega spremljanja in kritične presoje najnovejših dosežkov s področja strojništva in širše,
- sposobnost aktivnega pisnega in ustnega sporazumevanja na visoki strokovni kot tudi na poljudni ravni, odvisno od ciljnega občinstva,
- sposobnost timskega dela s strokovnjaki z različnih področij,
- poznavanje in razumevanje osnovnih fizikalnih in matematičnih zakonitosti, ki so lastne vsem področjem tehnike,
- obvladovanje izbranih orodij matematike za reševanje problemov v tehniki,
- obvladovanje računalniške podpore za načrtovanje in optimiziranje proizvodno-logističnih sistemov,
- sposobnost reševanja konkretnih problemov z uporabo numeričnih metod in orodij,
- sposobnost prevzeti odgovornost za lasten poklicni in osebnostni razvoj,
- sposobnost delovanja v sozvočju s poklicno, okoljsko, socialno in etično odgovornostjo.

Objectives and competences:

The learning unit mainly contributes to the development of the following general and specific competences:

- ability of independent and creative research and development work in the field of mechanical engineering,
- ability to independently perceive and critically assess the latest achievements in the field of mechanical engineering and beyond,
- ability to actively communicate in writing and orally at a high professional as well as at a popular level, depending on the target audience,
- ability to work in teams with experts from different fields,
- knowledge and understanding of basic physical and mathematical laws, which are common to field of technology,
- mastering selected mathematical tools for solving problems in technology,
- mastery of computer support for planning and optimization of production logistics systems,
- ability to solve concrete problems with the use of numerical methods and tools,
- ability to take responsibility for one's own professional and personal development,
- ability to work according to professional, environmental, social and ethical responsibility.

Predvideni študijski rezultati:**Intended learning outcomes:**

<p>Študent/študentka se usposobi za:</p> <ul style="list-style-type: none"> • spoznavanje vplivov človeka na okolje, • razumevanje procesov, ki potekajo med človekovo aktivnostjo in naravo, • uporabo pridobljenih znanj, • prepoznava vzročno-posledične odnose in razvršča podatke po pomembnosti, • za analizo dolgoročnih vplivov kakovosti posameznih tehnologij in sistemskih rešitev na okolje, • snovanje in razvijanje okolju prijaznih tehnoloških rešitev, • za oceno okoljskih vplivov posameznih tehnologiji. 	<p>Students:</p> <ul style="list-style-type: none"> • learning about human impacts on the environment, • understanding the processes that take place between human activity and nature, • use of acquired knowledge, • identify cause-and-effect relationships and ranks data by importance, • are able to analyze the long-term impacts of the quality of individual technologies and system solutions on the environment, • able to design and develop environmentally friendly technological solutions, • are able to assess the environmental impacts of individual technologies.
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Metode poučevanja in učenja:**Learning and teaching methods:**

<ul style="list-style-type: none"> • <i>predavanja</i> z aktivno udeležbo študentov (razlaga, diskusija, vprašanja, primeri, reševanje problemov), • <i>avditorne vaje</i>: reševanje problemov, študije primerov, kritično presojanje, diskusija, refleksija izkušenj, vrednotenje, projektno delo, timsko delo, • <i>seminar</i>: priprava, predstavitev in uspešen zagovor projektne/raziskovalne naloge, (reševanje problemov, študije primera, kritično presojanje, diskusija, refleksija izkušenj, vrednotenje, projektno delo, timsko delo). 	<ul style="list-style-type: none"> • <i>lectures</i> with active student participation (explanation, discussion, questions, examples, problem solving), • <i>tutorial</i>: problem solving, case studies, methods of critical thinking, discussion, reflection of experience, evaluation, project work, team work, • <i>seminar tutorial</i>: presentation and defence of project/research work (problem solving, studies, critical thinking, discussion, reflection of experience, evaluation, project work, team work).
